# PROJECTS

## Mbooking  –  Freelancer portal(multi vendor)
*Present*

- The web platform acts as a dynamic marketplace linking clients with freelancers, enabling efficient project management and seamless communication. Comprehensive contact management facilitates easy collaboration, enhancing productivity and workflow efficiency.
- This project is designed and developed with scalability and maintainability in mind **clean architecture** .
- This project has features like hiring freelancer, work post, send proposal , chat, notifications , contract management and many more.

### Technologies used
- **Node.js , Express , MongoDB, React.js, Redux,**
- **Clean architecture, socket.io,  firebase otp, tailwind**
- **Stripe, nodemailer, multer, s3 bucket,**

**Git repo :**  Frond-end ,  Back-end

## Coza Store – E-commerce
- Developed an e-commerce platform specializing in the sale of watches. Integrated essential features such as wishlists, cart, coupons, and discounts, along with **Razorpay payment gateway**. Managed orders, product offers, category offers, return options, password recovery, and wallet functionality. Utilized Figma for design, **Express template engine EJS** for backend development, and implemented AJAX for frontend enhancement. Additionally, employed **MVC architectur**e to maintain maintainability and scalable code.

### Technologies used
- **Node.js , Express , MongoDB, MVC architecture,**
- **Razorpay,  nodemailer,  multer, Ajax, ejs,**

**Git repo :**  Coza Store

# MIN PROJECTS

## USER MANAGEMENT SYSTEM | Node.js, Express, REACT JS, Redux,  JWT, MongoDB
- Developed a User Management and UserProfile system.
-  utilizing React, Redux, JWT, **Axios, ContextAPI**, and MongoDB technologies. Implemented user registration and authentication functionalities.

**Git repo :**  Frond-end ,

## NETFLIX CLONE | REACT JS,  JWT, ContextAPI , TMDB, AXIOS
- Developed a Netflix clone interface with movie posters
- integrated **React** and **Axios** to **fetch** movie data from **TMDB API**
- Implemented trailer playback functionality using **Youtube videos**

**Git repo :**  Frond-end ,

# EXPERTIES
- node.js
- typescript
- react.js
- clean architecture
- MVC architecture
- express.js
- socket.io
- mongo-DB
- redux
- firebase
- Data structures
- tailwind
- postman
- jwt
- figma
- CI/CD
- GitHub Actions

# INTEGRATIONS
- RazorPay
- Stripe
- S3
- firebase verifications
- node mailer
- multer

# ALSO FAMILIER
- twilio
- postgres

# EDUCATION
2024 - present
